DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. The drawings are objected to because Figs. 16A and 16B have not been labeled as "Prior Art". Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 18 – 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A claim cannot have portions that are independent and other portions that are dependent. The claim must be entirely independent or entirely dependent on another claim, accordingly, claims 18 – 20 must be rewritten.

Allowable Subject Matter

5. Claims 1 – 17 are allowed.
6. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not suggest or teach a drive mechanism for driving a movable portion with respect to a stationary portion and having a connecting member having at least one monolithic planar 3 - or 4 – joint link mechanism.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Saner (US 5,095,764) disclose a transducer, which is a different field from the applicant's invention, but the transducer has two plates (21) which act as

a force applying mechanism and each plate (21) has four joints (51, 53) and four links (47, 49).
